

Exercises to the Lecture FSVT

Exercise 18:

Do the exercise on the consumer/producer-problem from slide 144.

Exercise 19:

1. Prove or disprove correctness of the abstract version of termination detection algorithm from slide 156.
2. Answer the question from slide 158, whether the given DASM on the termination detection problem is a refinement of the more abstract DASM. Take the problems resolved into consideration.
